

The following NCCS data and services are available to the public. Access may require an account or be open. Additional data and services are available internally. Please contact support@nccs.nasa.gov for more information.

Data:

Cloud Library – Web download access to Hydrological Sciences Lab cloud data products, access requires an account for reporting purposes.

OSSE – Web download access to Observing System Simulation Experiments, access requires an account for reporting purposes.

Joint OSSE – Web download access to Joint Observing System Simulation Experiments, no account required.

GISS ModelE – Web download access to Goddard Institute for Space Science ModelE data, no account required.

GMAO Products – Various GEOS-5 products available through GDS, no password required.

IPCC AR5 Products (GISS, GMAO, MERRA, CERES, TRMM) – Available through the Earth System Grid (ESG) with selected products available through Live Access Server (LAS). Account required.

Services:

Web Download via apache

FTP – Data available to select projects and their colleagues.

GrADS Data Server (GDS)

Web Map Service (WMS) – WMS access to GMAO products, aerosols and SVS visualization products. Use any WMS compliant client to access the data.

Earth System Grid (ESG) – Access to climate model data and NASA observation data for the 5th Assessment Report of the Intergovernmental Panel on Climate Change (IPCC).
